

Dante Domain Manager v1.0.3.13 Release Notes

Release date: 3rd July 2018

Document version 1.0

Known Issues

Issue	Description
MIL-1519	Clearing Tx channel label does not add a proper message in the audit log
MIL-2351	DDM does not change the address it sends in the ConMon enrol message on address change
MIL-3195	Cannot select more than 242 devices at once on DDM
MIL-3197	Legacy devices might be lost in DC after a rename in domain mode
MIL-3754	Long device name overwrites unicast clocking status in Advanced Clock Settings
MIL-3764	Appliance needs to be run as admin in VMWare Workstation Player
MIL-3797	A bulk enroll by IP fails if legacy interop is disabled at the point a legacy device is encountered in the list
MIL-3805	DC: No Tooltip for error 'Transmitter setup failed'
MIL-3820	AES67 reboot required for legacy device is broken if pullup on reboot is set
MIL-3874	DDM Configuration (console) menu doesn't update when IP address changes
MIL-3922	Offline device enrollment using IP address sometimes doesn't work
MIL-3926	Demo license upgrade alert can persist
MIL-4247	Audit log entry missing the second to last configuration change if 2 or more configuration changes are done at once
MIL-4280	SNMP - A reboot is required after an upgrade from 1.0.0.14 to 1.0.2.4 for SNMP to work
MIL-4316	Adding a domain filter in the dashboard hides internal service alert
MIL-4318	Device offline alert disappears when Dante discovery is disabled
MIL-4467	Via - Subs show Tx Access control denied error but no change in audio
MIL-4550	Firefox prompts to store passwords on every location change. Workaround is to choose "never save" in the prompt
MIL-4606	Audit log entry for the codec control message is repeated
MIL-4609	Inconsistent login behaviour for user accounts assigned a role of "None". Logins are permitted for local users but refused for LDAP users
MIL-4635	Large latency settings not cleared when leaving a domain without clearing config
MIL-4656	Disassociated legacy device with subscriptions having mismatched clock domain
MIL-4693	Editing email and/or username with rejected values can cause changes without audit logging
MIL-4697	Renaming groups after creation allows groups with the same name
MIL-4700	LDAP group add screen disappears after clicking add if the group cannot be created (e.g. invalid name or query is entered)
MIL-4703	Audit log entry is not descriptive when clearing user full name and/or email addresses
MIL-4704	Reboot alert not raised after associating an AES67 enabled legacy device
MIL-4705	Existing subscriptions to legacy device multicast flows are sometimes unresolved after a subscribing managed device is enrolled
MIL-4718	No clock grandmaster information is displayed for a domain if the grandmaster is a legacy device
MIL-4730	A legacy device can be duplicated if it is enrolled with its link local IP address before it receives a DHCP address. The workaround is to forget the enrolled duplicate legacy device that is offline
MIL-4754	Legacy Ultimo devices enrolled in DDM v1.0.2.6 do not present as enrolled in Dante Controller after upgrading DDM to v1.0.3.13. Workaround: Restart the DDM server.

Resolved Issues

Issue	Description
MIL-4744	Partially mitigated an issue causing data loss in exports from DDM 1.0.2. Shared clocking groups that suffered data loss have their names replaced with "Recovered Group XXX".
MIL-4688	The privileges section is disabled when editing the "admin" user
MIL-4695	Non-LDAP users can change their password via the user menu
MIL-4711	Fixed minor grammatical error in advice for if you have an HA-Only license on a standalone machine
MIL-4720	Fixed an error that caused license expiry audit log events to be rendered incorrectly
MIL-4721	Added license server reach-ability test to network diagnostics. Internet reach-ability test also tests www.baidu.com in addition to www.google.com.
MIL-4723	HA-Remote controller panel is greyed out in Dante Controller for an enrolled MY16 device
MIL-4724	Fixed security issue when using LDAP / Email Reset
MIL-4586	Audio can glitch for high channel count devices when DDM comes back online
MIL-4598	Associated legacy BKLYN cannot subscribe to other devices in a domain
MIL-4623	Fixed users cannot edit username after typing "admin" into the User's username box
MIL-4626	Offline associated legacy devices cannot be disassociated when their domain is deleted
MIL-4633	Text change to an alert
MIL-4644	Fixed an error that caused some elements to be incorrectly positioned when using browser zooming
MIL-4650	During the onboarding process, a DDM will not be discoverable
MIL-4651	Fixed misalignment of text in the progress screen while licensing the DDM
MIL-4659	Added additional Inline help for the Device Info group
MIL-4661	Fixed Inline help could not be closed when logged in with a long username
MIL-4677	Old adverts for renamed devices are not always removed
MIL-4679	Changed help and padlock icons
MIL-4684	Mark legacy devices offline during an enrolment event
MIL-4579	DDM loses device ConMon status messages due to firewall rules dependent on source ports
MIL-4604	Fixed minor graphical and layout inconsistencies in the user interface
MIL-4607	Fixed an error shown when logging in with the wrong username/password for an LDAP user
MIL-4610	Fixed LDAP users appearing to be editable
MIL-4612	Added additional Inline help for LDAP Groups Section
MIL-4618	Fixed Devices appearing editable for users with Operator permissions
VIA-2613	Via cannot see other Via apps in a domain
MIL-3320	Editable Domain Name support
MIL-4468	Dante HY testing: 4.0.8.3 - some subs go UNRESOLVED after latency change on RXD
MIL-4487	UI for Displaying Network Diagnostics
MIL-4527	Device Controller Permissions - reinforce device capabilities are reduced
MIL-4565	DDM: Prompt user to reboot machine after setting hostname in DDM configuration menu
MIL-4568	No Audit log entries present for external service (LDAP) failures
MIL-4571	When editing a click edit field, it still closes and shows the update even on failure
MIL-4437	Mechanism to remove domain locked devices if DDM license has expired e.g. end of free trial
MIL-4554	Implement EULA process for handling onboarding by third parties in the UI
MIL-4256	Spec for Legacy Device Discovery UI (using mDNS)
MIL-4488	Scripts to gather additional DDM networking info
MIL-4517	Forbid enrolment of discovered devices that are locked

Issue	Description
VIA-2596	Via UI cannot see other Vias as Via devices when enrolled
MIL-4443	Add domain name UTF8 string to info provided to connected devices
MIL-3454	LDAP - User cannot login after loginName value has been changed in AD Server
MIL-3587	DDM audit log details displays [] for DDP device rename command
MIL-3891	DDM UI slow to update status during config upload
MIL-3912	Improper shutdown or power failure on appliance can cause IP address lease to persist when moved to new environment
MIL-3930	DDM: system information menu might be slow to display
MIL-3938	DDM: Device specific alerts with audit log links should be filtered
MIL-3942	DDM: Text boxes for username and password sometimes cleared when adding new user
MIL-4169	DDM HA - Dashboard widget shows Dante Discovery service when HA is enabled
MIL-4219	DDM Licence can be deactivated without an internet connection
MIL-4243	DDM: Software becomes temporarily unlicensed when the Device Manager is restarted
MIL-4253	Customize columns ignores existing audit log filter
MIL-4306	Reword (and change defaults for) Embedded Controller Policy section on device page to improve understanding of this function
MIL-4314	No TLS certificate expiry alert and auditlog entry
MIL-4321	Users with domain specific domain admin permissions cannot create a new shared group
MIL-4326	Audit log of shared audio group is confusing
MIL-4327	Email dashboard service description should not refer to sending notifications
MIL-4341	SNMP - License Expiry shows a wrong date on SNMP Get of danteDomainMgrLicenseExpiry for TRIAL License
MIL-4374	exception on selecting network interface in DDM
MIL-4376	Add "Clear Audit Log" Button
MIL-4414	DDM: ConMon monitoring messages being forwarded between devices after enrolment (scalability)
