Outputs	Subwoofer Pre-Out (RCA Jack)

(2-8) 4" (102mm) Aluminum Cone Woofers (8) 0.75" (19mm) Aluminum Dome Tweeters in Quad-Arrays Built-In 2 x 100 watt amplifier with IR sensor

The SPL4QLR-P Powered SoundBar features a James Loudspeaker designed amplifier built into the center of the bar. The powered SoundBar amplifier inputs include HDMI-ARC, optical, and others (see input section to the left). It sets new levels in sound output and wide frequency response. James Loudspeaker has taken their proprietary quad-tweeter technology from the BE reference series and scaled it down to a compact array of four 0.75" (19mm) aluminum dome tweeters to provide a wide dispersion angle. When combined with James' high output 4" (102mm) woofers, the SPL4QLR-P has bass down below 65Hz, delivering high efficiency, low distortion, and crisp clear audiophile sound. Designed as a left and right channel, the SPL4LR-P is perfect for any stereo system application.

The cabinet design features all aircraft grade aluminum for strength and sonic performance. Complete with a custom fit and colored stainless steel perforated grille, this SoundBar mounts directly to any TV. James custom fits each SoundBar to fit your TV perfectly to seamlessly integrate this speaker into any entertainment system, delivering a subdued visual effect, designed to be as unobtrusive as possible. Also available for wall mounting or configurable for other custom applications, this SoundBar combines high quality audio with elegant design for the perfect home entertainment solution. Brackets ordered separately.
